

Component 1:

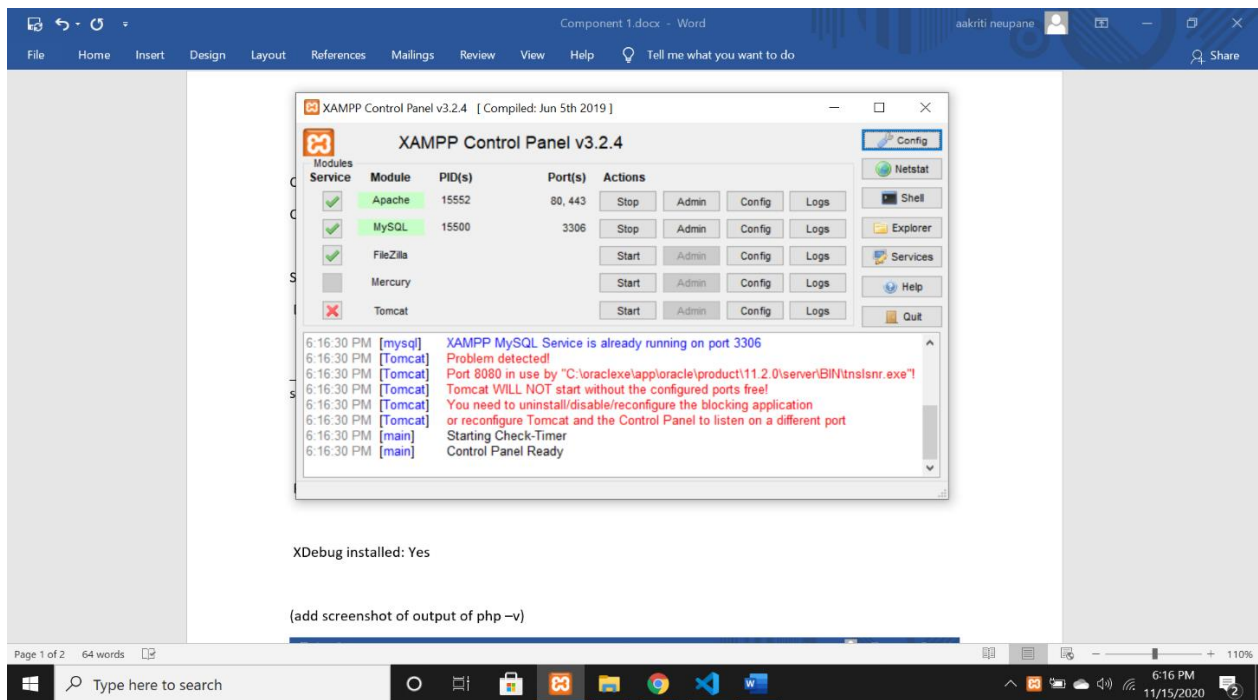

Checklist

Student Name/ID: Aakriti Neupane / 77202786

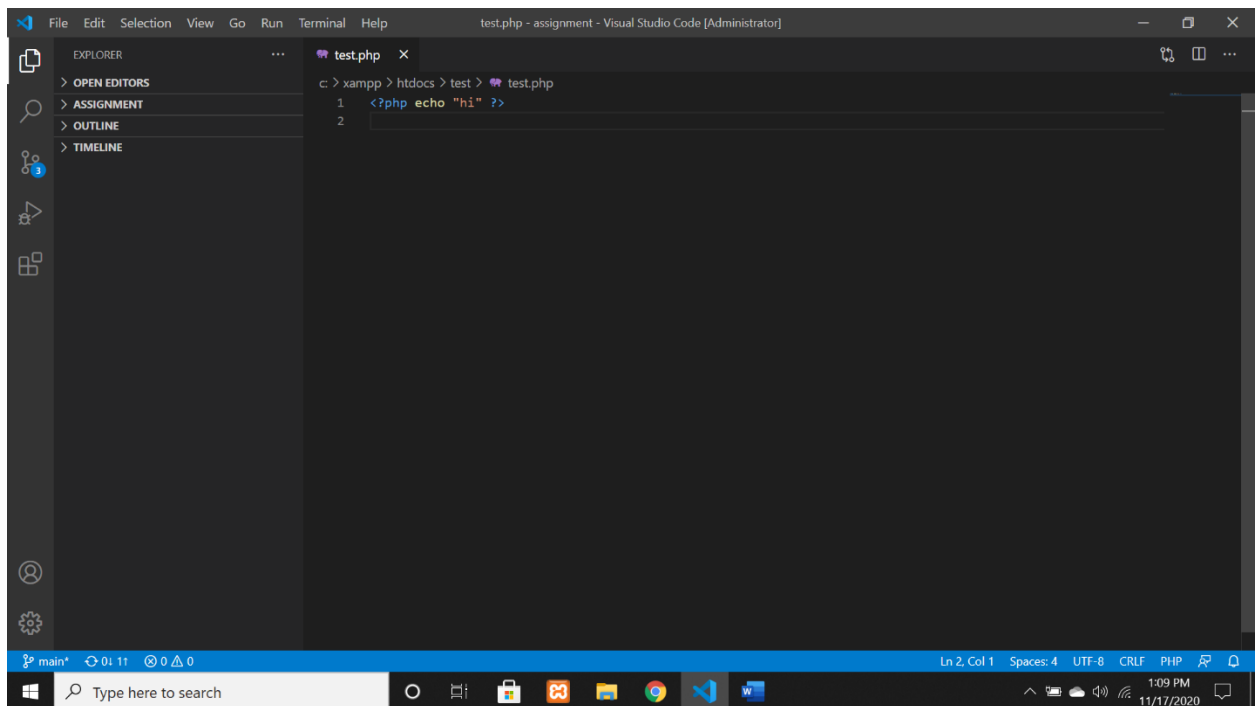

Development Choice: Visual Studio code / XAMPP

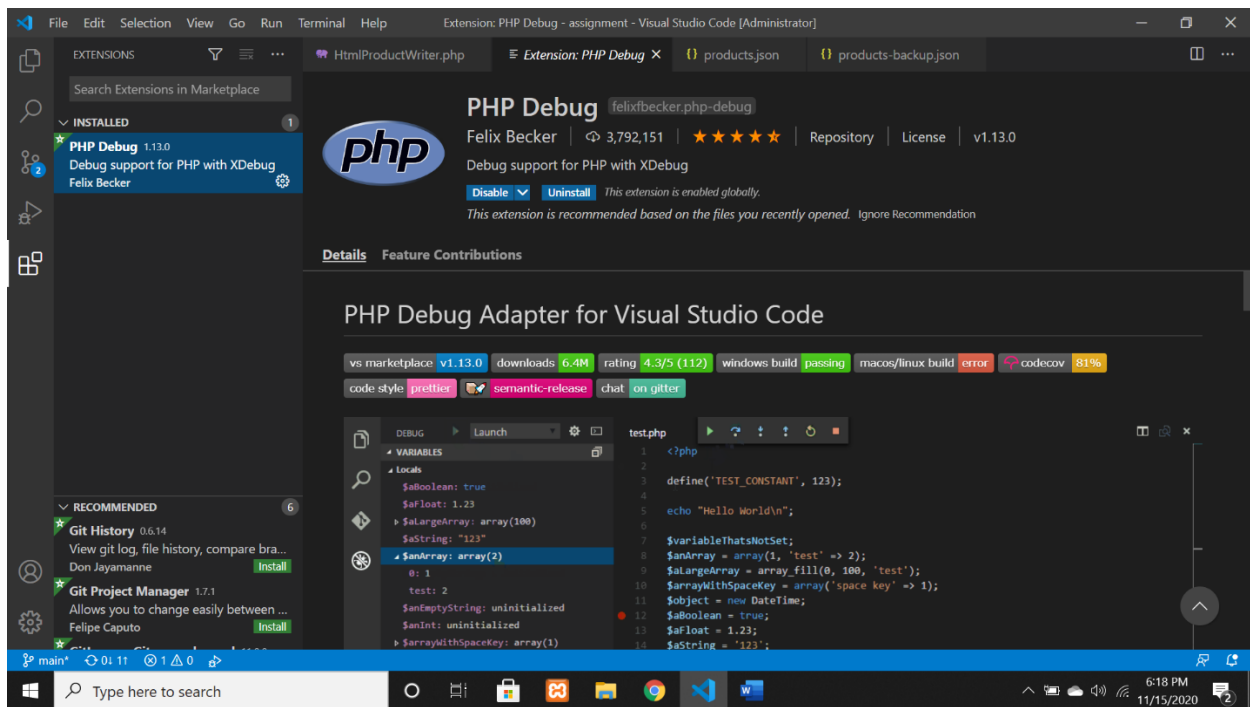

Xampp

Vs code as my code editor.

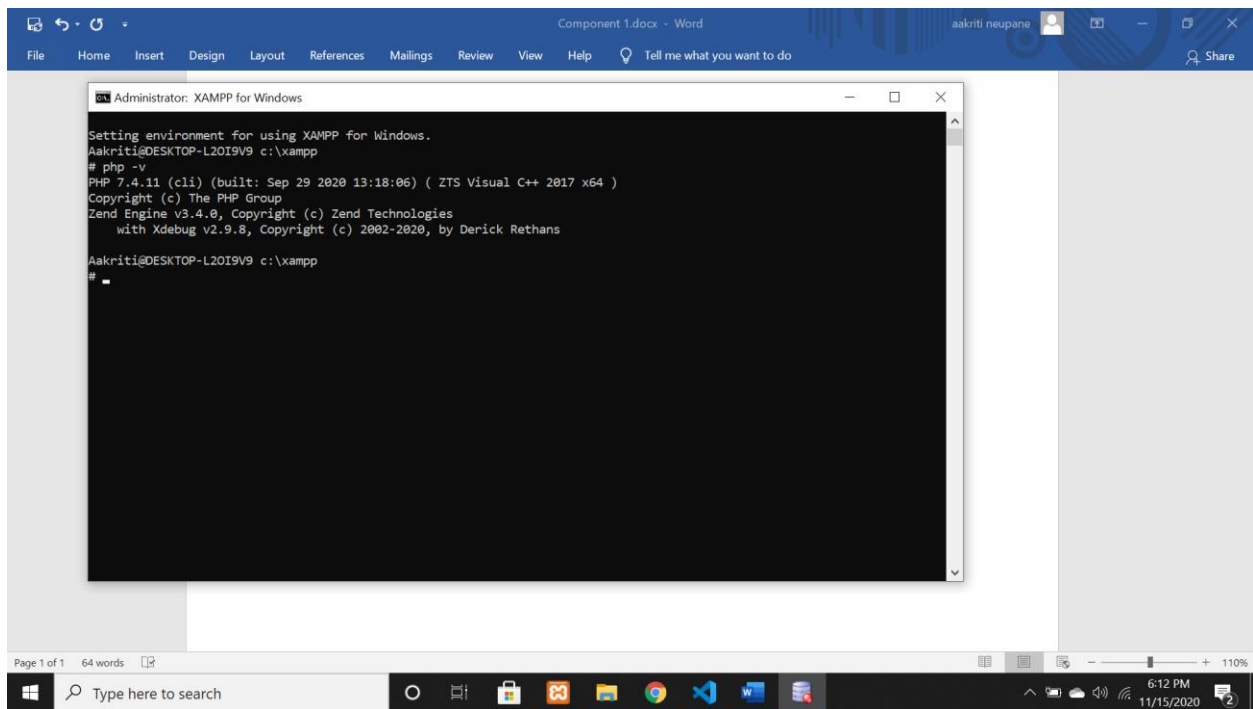

Xdebug was installed after downloading .dll file and adding to extension in php file and adding few lines in php.ini file. And finally installing it in vscode.

PHP Version being used: '7.4.11'

XDebug installed: Yes

Output of php -v:

Git account created and used: 'https://github.com/comp-bkt/component-1-Aakritiii.git'

Final output of php exercise –
